

Structure of the Paper

Section 2 Related Works

Section 3 Automated Hiring: Architecture, Failure Landscape, Regulation

Layered Architecture
and Surfaces

Failure Landscape

Current State and
Industry Trends

Landscape of Grounding,
ML, and DL

Section 4 Evidence Grounding as an Enabler

Grounding-Centric
Extraction

Integrity Functions
Enabled by Grounding

Open Challenges in
Grounded Extraction

Section 5 ML Techniques for Candidate Screening

Taxonomy of ML
Paradigms

Representative Models
and Use Cases

Nine-Model
Benchmark

Architectural
Integration of ML

Open Challenges and
Research Directions

Section 6 DL for Identity and Extraction

DL Architectures

Applications in Identity
and Provenance

Threshold Calibration
and Abstention

Deployment Challenges

Section 7 Synergistic Integration of Grounding-ML-DL

Motivation for
Integration

System Architecture
and Integration Stack

Evaluated Benefits
and Impact

Integration Challenges

Standards and
Regulatory Compliance

Section 8 Deployment Experiences and Lessons

Use Cases of Grounding,
ML, and DL

Lessons Learned from
Real Deployments

Section 9 Future Directions and Research Opportunities

Deployment-Aware
Audit Architectures

Explainable and
Contestable Screening

Privacy-Preserving
Process Evidence

Within-Query
Evaluation Standards
